

Apply & Innovate - TECH WEEKS - Closed Loop Connected Autonomous Vehicle Data Logging and Perception Testing using High Fidelity Synthetic Environments

September 2020

Presenters: ¹J Groenewald, ²A Naik

¹WMG, University of Warwick, Coventry CV4 7AL, UK, e-mail: j.groenewald@warwick.ac.uk

²NI, Measurement House, Newbury, RG14 2PZ, UK, email: ashish.naik@ni.com

Content

- Introduction
- Background and Motivation
- Quick IV Facilities and Equipment Overview
- The 3xD Simulation System updates and the NI, IPG, rFpro demonstrator
- Test Continuum: How NI enabled the demonstrator?

Introduction: WMG

- ▶ An academic department within the science faculty of Warwick University
- ▶ Established in 1980 by Professor Lord Bhattacharyya as Warwick Manufacturing Group to facilitate technology transfer and knowledge creation for Industry
- ▶ 500+ people (800+ university and industry) working in 10 buildings
- ▶ Training over 1,500 individuals in the UK and abroad (from school to post experience)
- ▶ Co-located with Jaguar Land Rover & Tata Motors European Technical Centre

BACKGROUND: CHALLENGES FOR CAVs IN NUMBERS

11 Billion miles¹

To demonstrate with 95% confidence that AVs are 20% better than human drivers

100,000 lives²

Saved (in the next 30 years) if AVs which are 10% better than human drivers are introduced

Around 50%³

Of the time, drivers don't use current ADAS systems

¹N. Kalra and S. M. Paddock, "Driving to safety: How many miles of driving would it take to demonstrate autonomous vehicle reliability?," *Transp. Res. Part A Policy Pract.*, vol. 94, no. December, pp. 182–193, 2016

²N. Kalra and D. G. Groves, *The Enemy of Good*. 2017

³A. F. L. Larsson, "Driver usage and understanding of adaptive cruise control," *Appl. Ergon.*, vol. 43, no. 3, pp. 501–506, 2012

BACKGROUND: CHALLENGES FOR CAVs IN NUMBERS

We need to ensure that new products and services are:

▶ **Dependable and affordable**

- ▶ In a complex real world operating environment
- ▶ With new high value components integrated on-board (and off!)

▶ **Commercially viable**

- ▶ With new entrants to the value chain
- ▶ And new services and business models

▶ **Desirable**

- ▶ Gaining public acceptance and trust
- ▶ Achieving societal benefits

How? *Learn from a continuum of simulation; testing; trials; and early deployment*

MOTIVATION: ACCELERATING TECHNOLOGY & SERVICE DEVELOPMENT

*To make future vehicles, technologies and services **dependable**, **desirable** and **viable**, we need to learn from a continuum of simulation, testing, trials and early deployment*

Modelling and Simulation

Controlled Environments

Public Environments

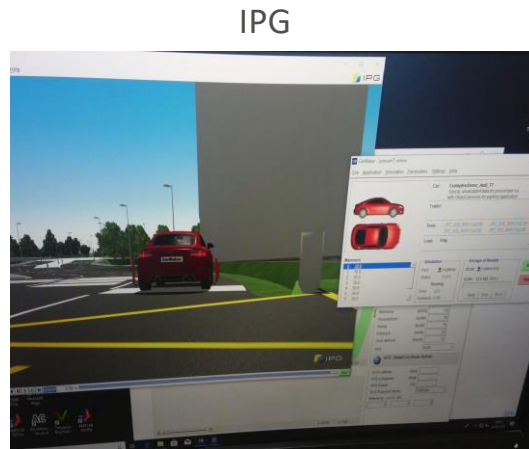

Aim: to confidently test/certify earlier in product development

<https://warwick.ac.uk/fac/sci/wmg/research/cav/ivfac>

WMG IV Facilities and Equipment Overview

Our Vision: To test or evaluate any new CAV technology (infrastructure, communications and on-vehicle) in representative real world conditions with a “driver” in the loop

The 3xD Simulation System –The early days and IPG

Autonomous Pod Testing in a Closed Loop

The 3xD Simulation System – World Models

The 3xD Simulation System – Sensor Models

Radar Sensor Model

Radar Status Start Radar Stop Radar

Update Rate -- Hz 10 Hz

Aperture -- Deg 50 Degrees

Channels -- 15 CH

Max Range -- Meters 60 Meters

Frequency -- GHz 77.00 GHz

Radar Mode Object Mode Raw Data Mode

Lidar Sensor Model

Lidar Status Start Lidar Stop Lidar

Update Rate -- Hz 4 Hz

Aperture -- Deg 40 Degrees

Channels -- 32 CH

Max Range -- Meters 50 Meters

Rain 0.000 Set Rain Disable Rain

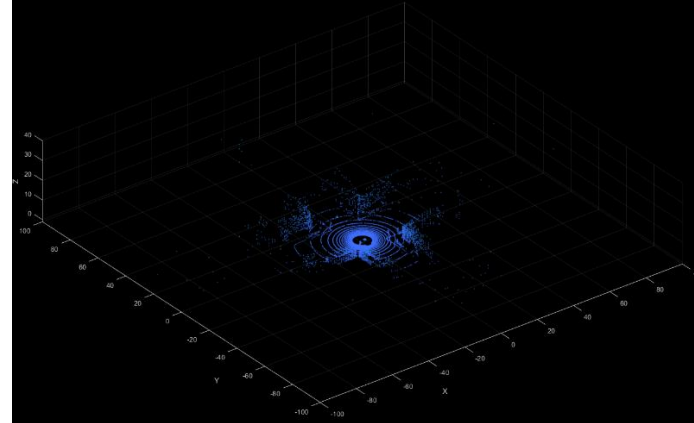

The 3xD Simulation System – World Models

Rain Rate = 25mm/h

Rain Rate =
0mm/h

Rain Rate = 99mm/h

WMG,NI, IPG, rFpro demonstrator

WMG,NI, IPG, rFpro demonstrator

The end of the first part.

Thank you for listening.

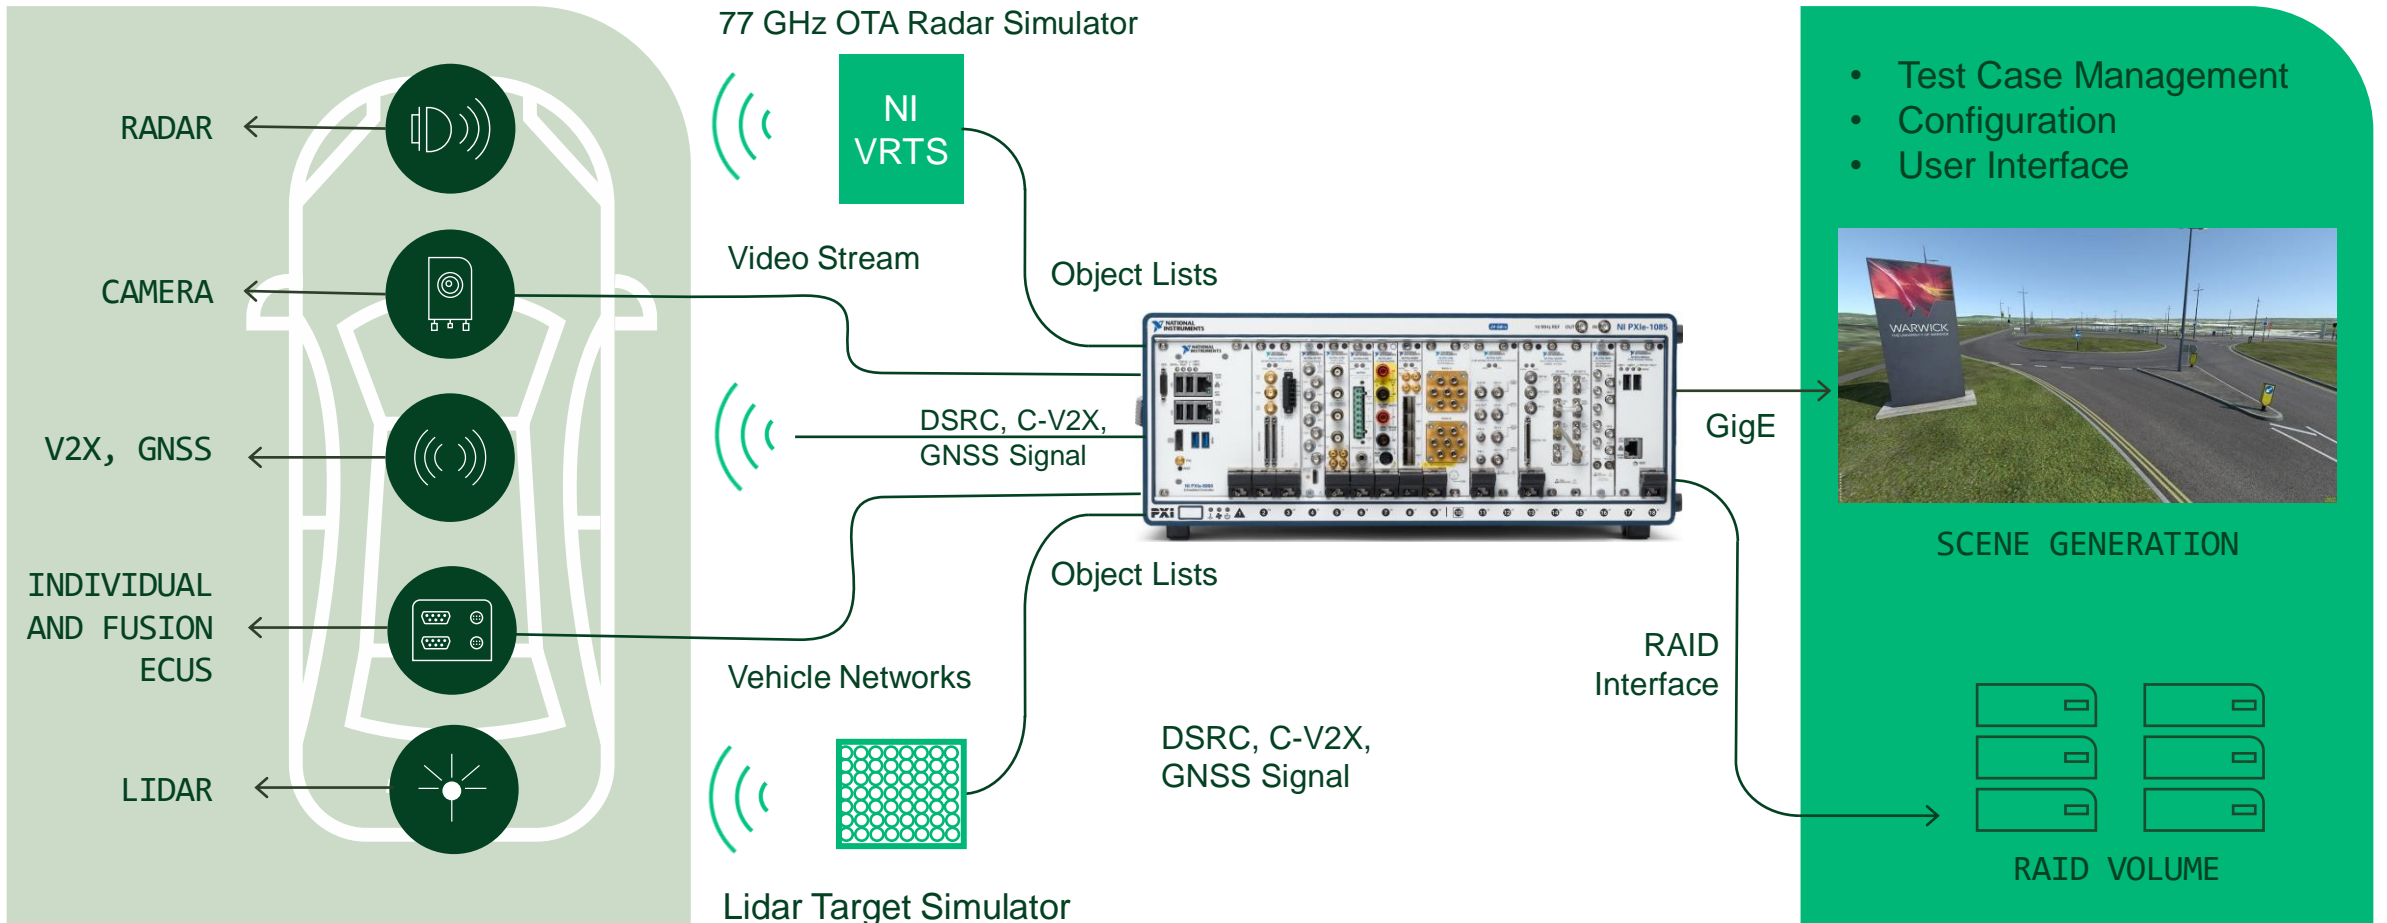

j.groenewald@warwick.ac.uk

(Jakes Groenewald, Lead Engineer– Intelligent Vehicles)

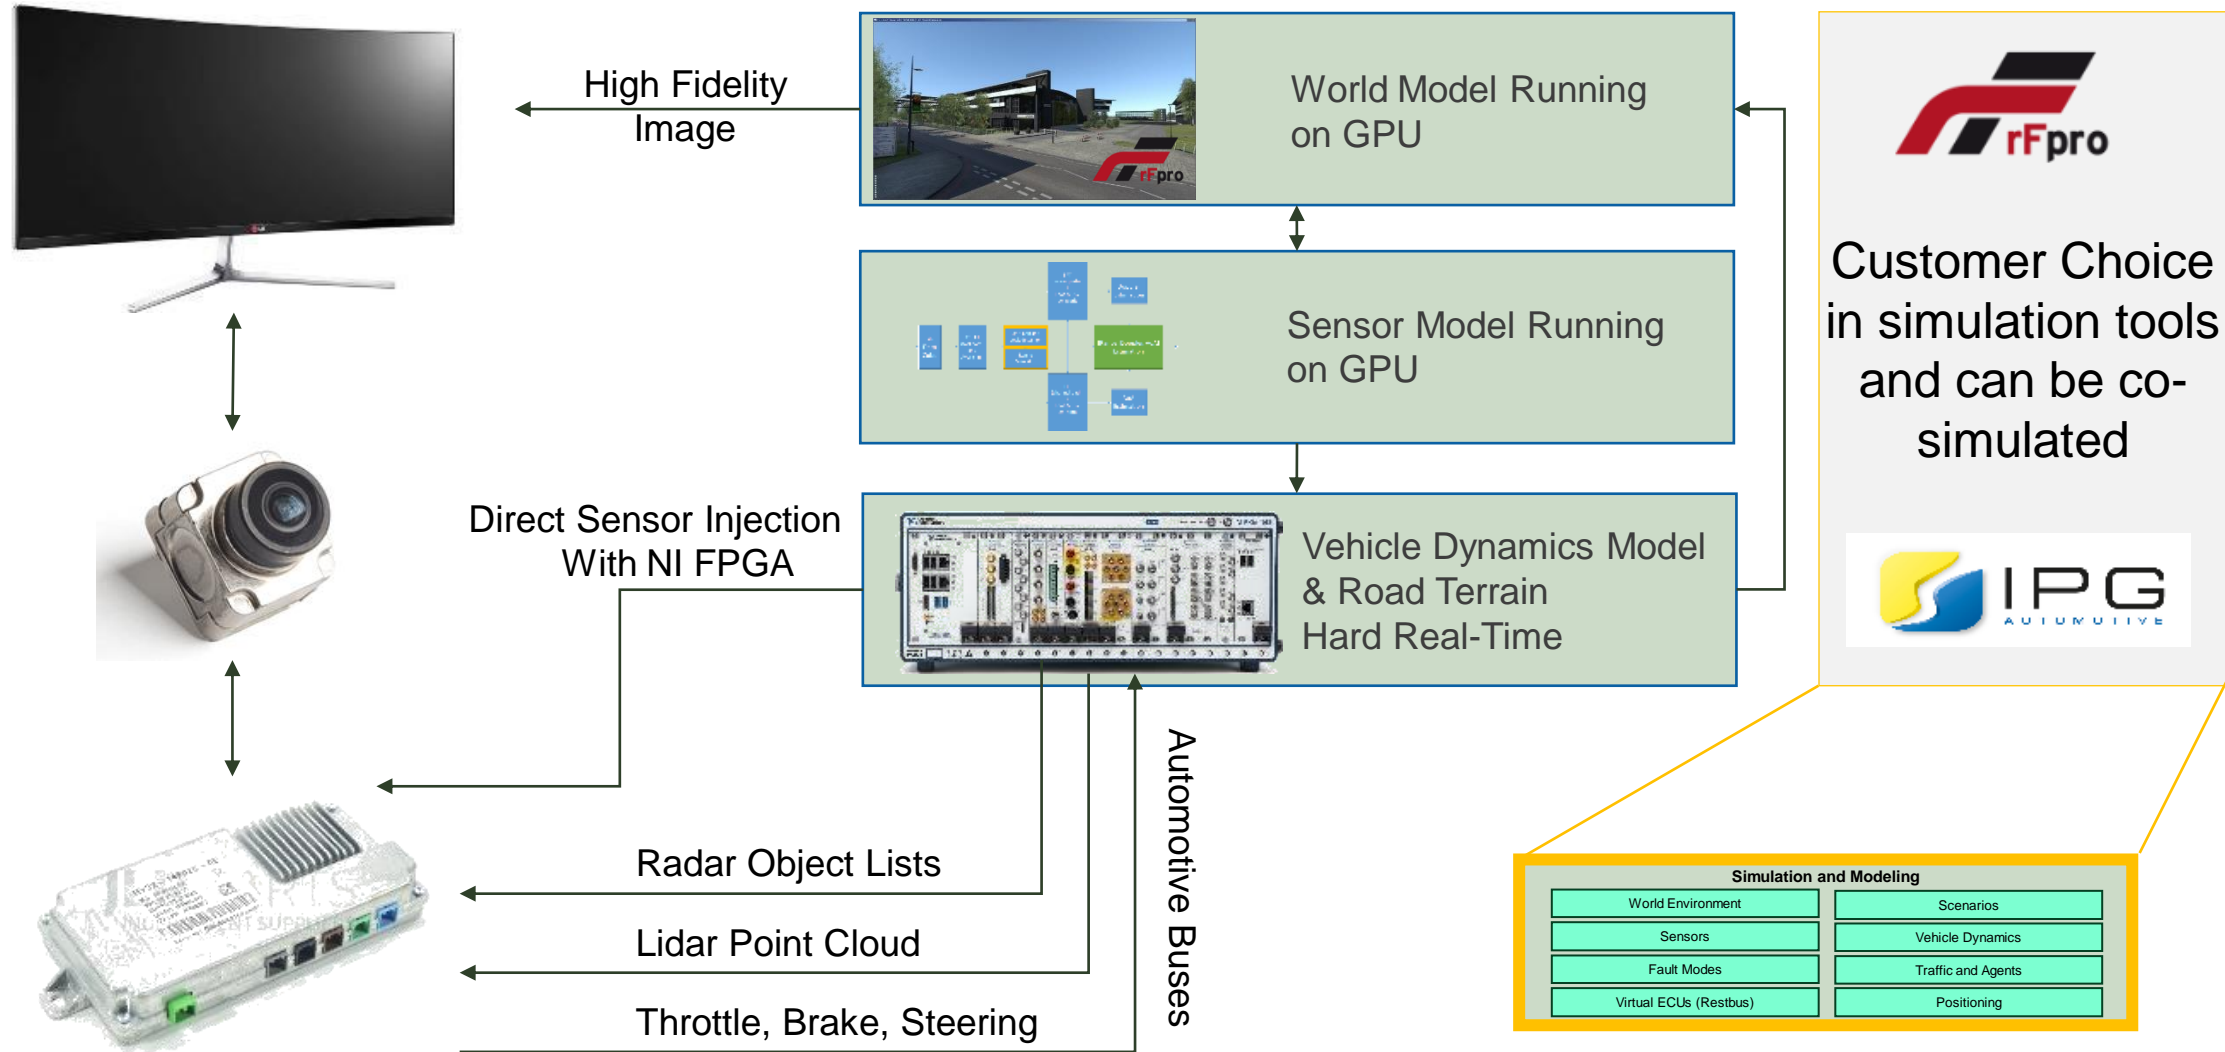

National Instruments
is now NI.

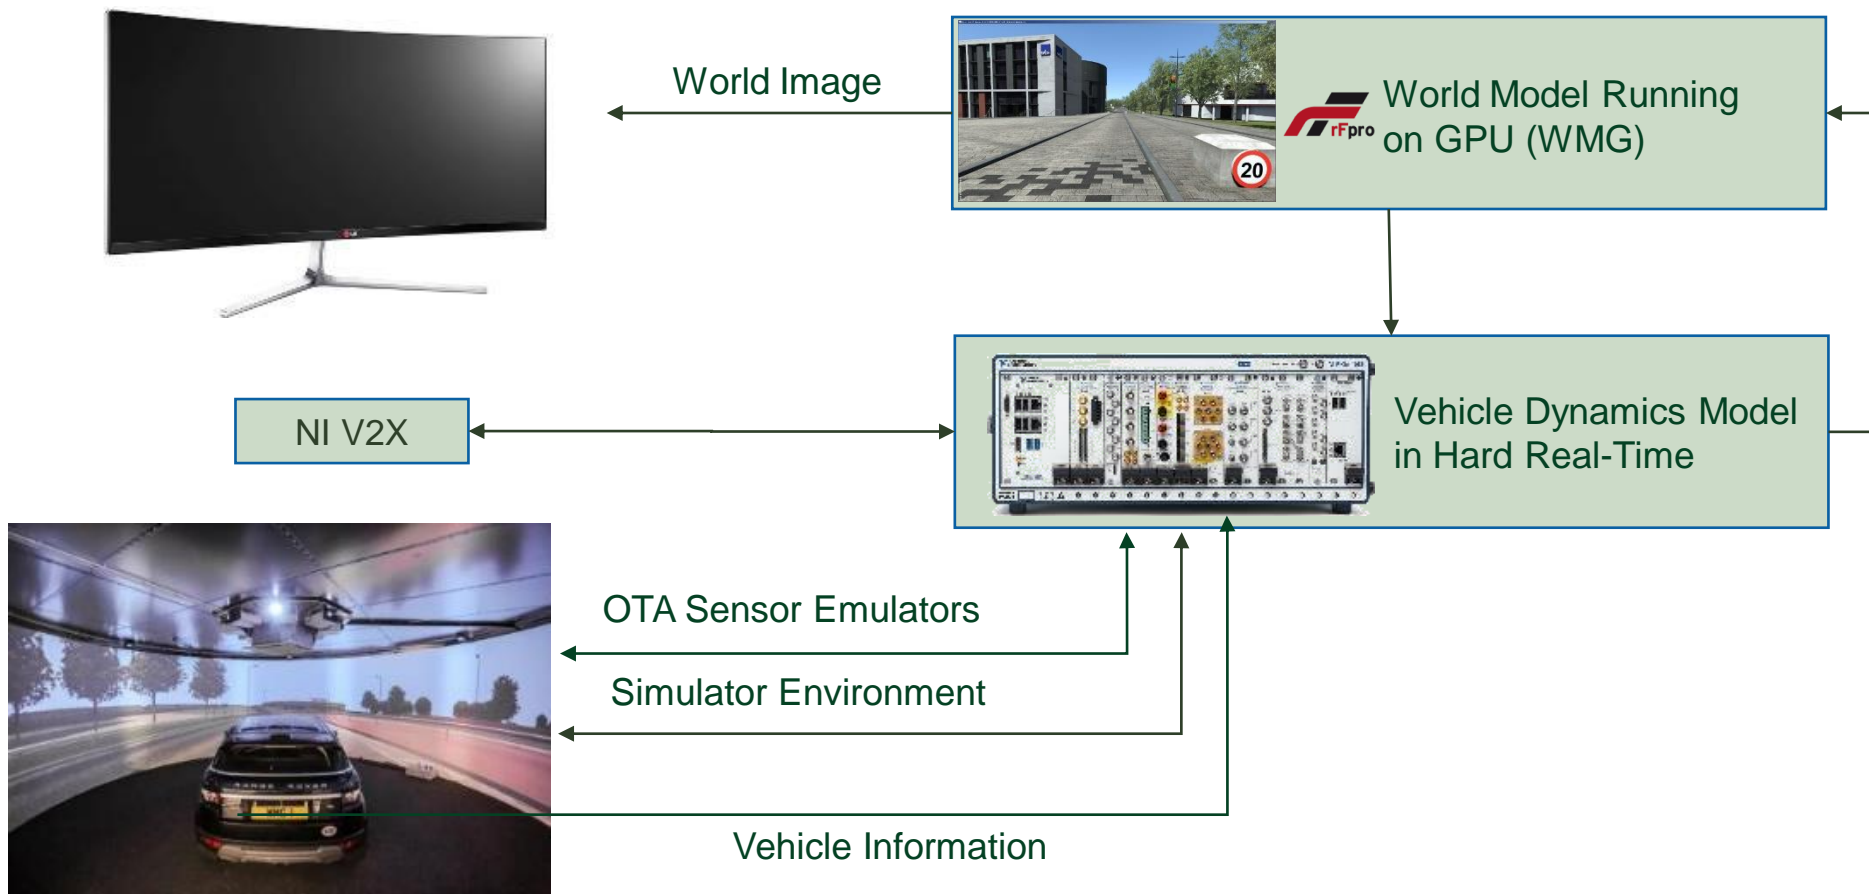

Single Platform for ADAS Test

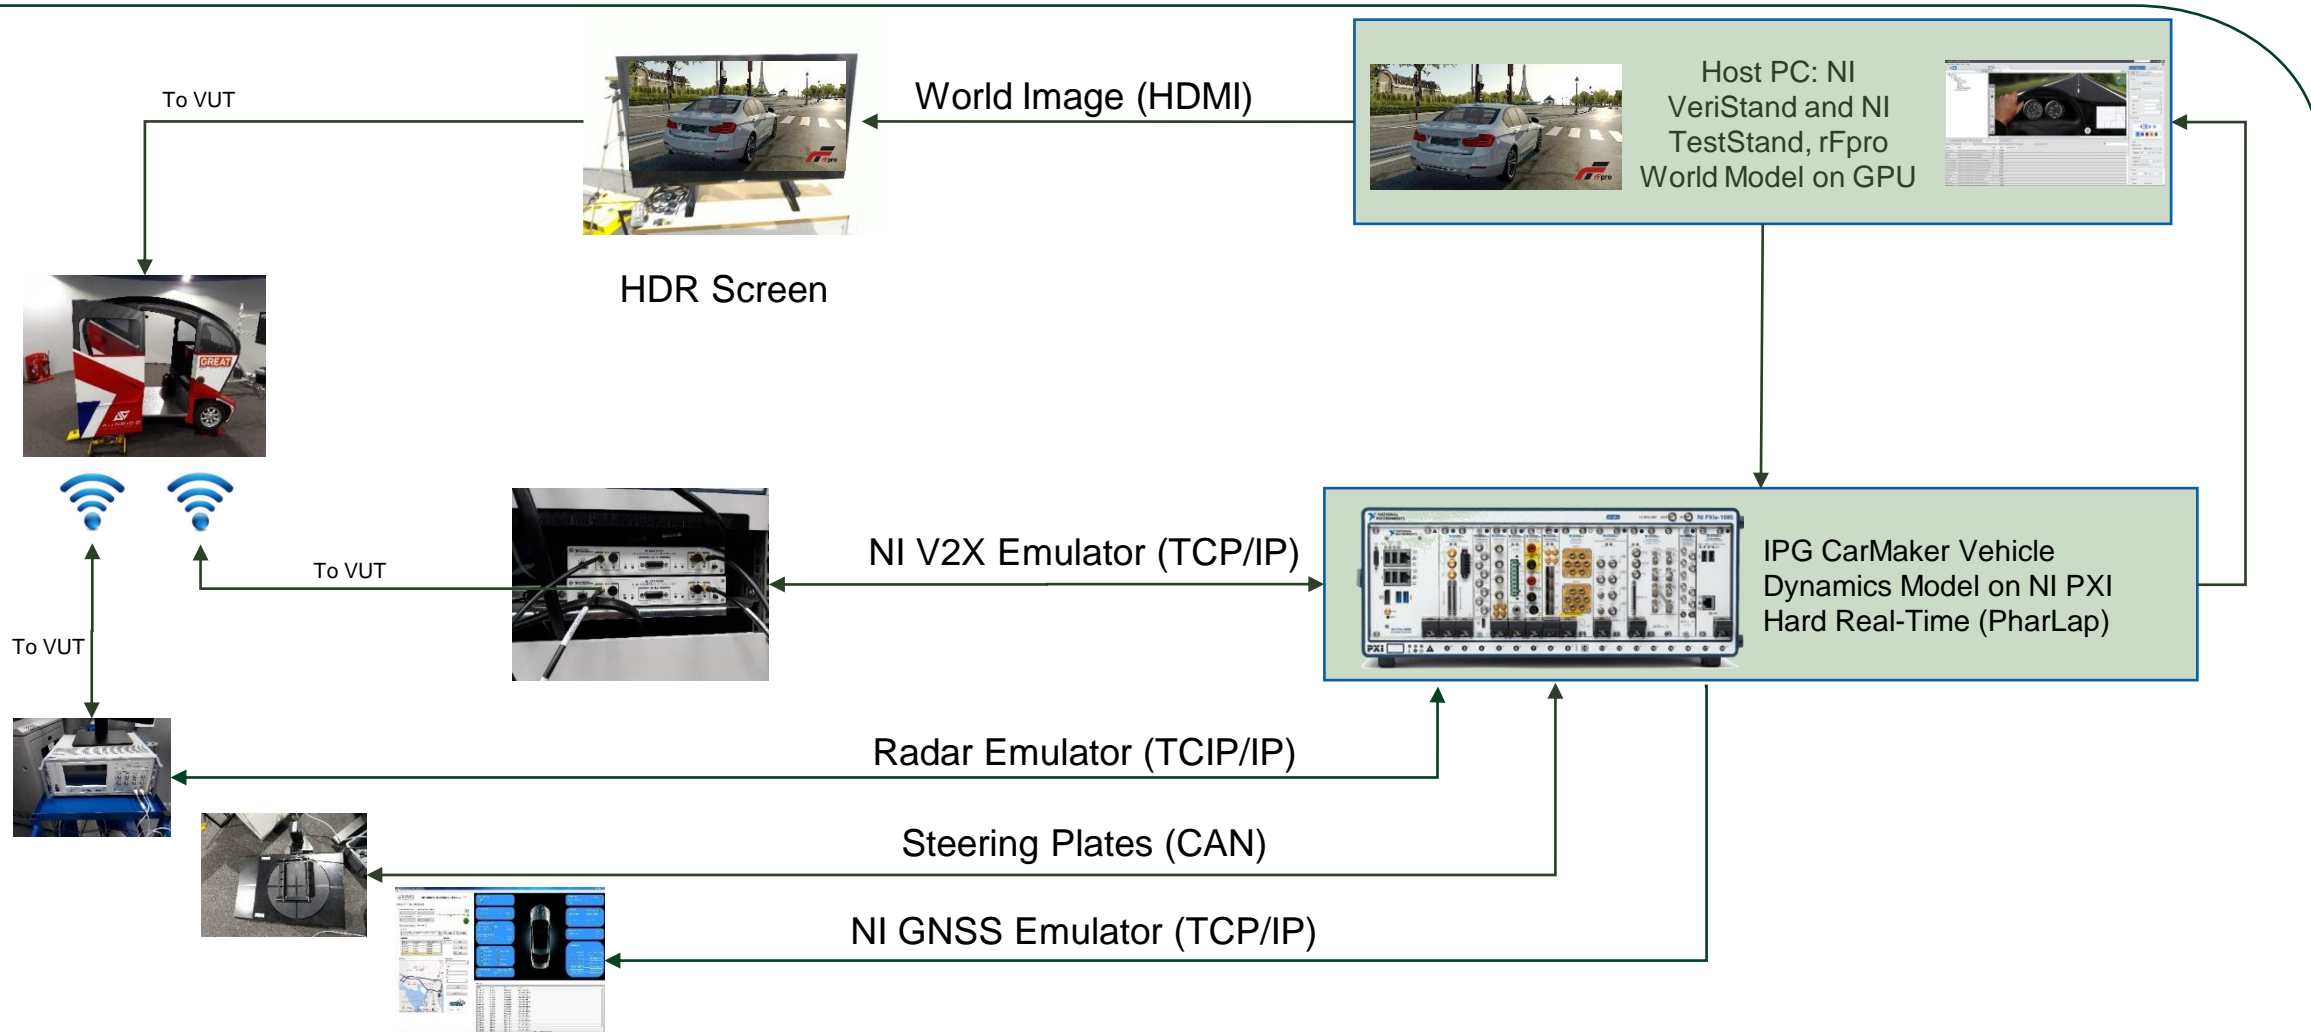

Closed Loop Perception Test – Camera Example

Closed Loop Perception Test - WMG Initial Project Example

Closed Loop Perception Test - WMG Initial Project Example Phase 2

Partnerships – stronger together & enabling customer choice

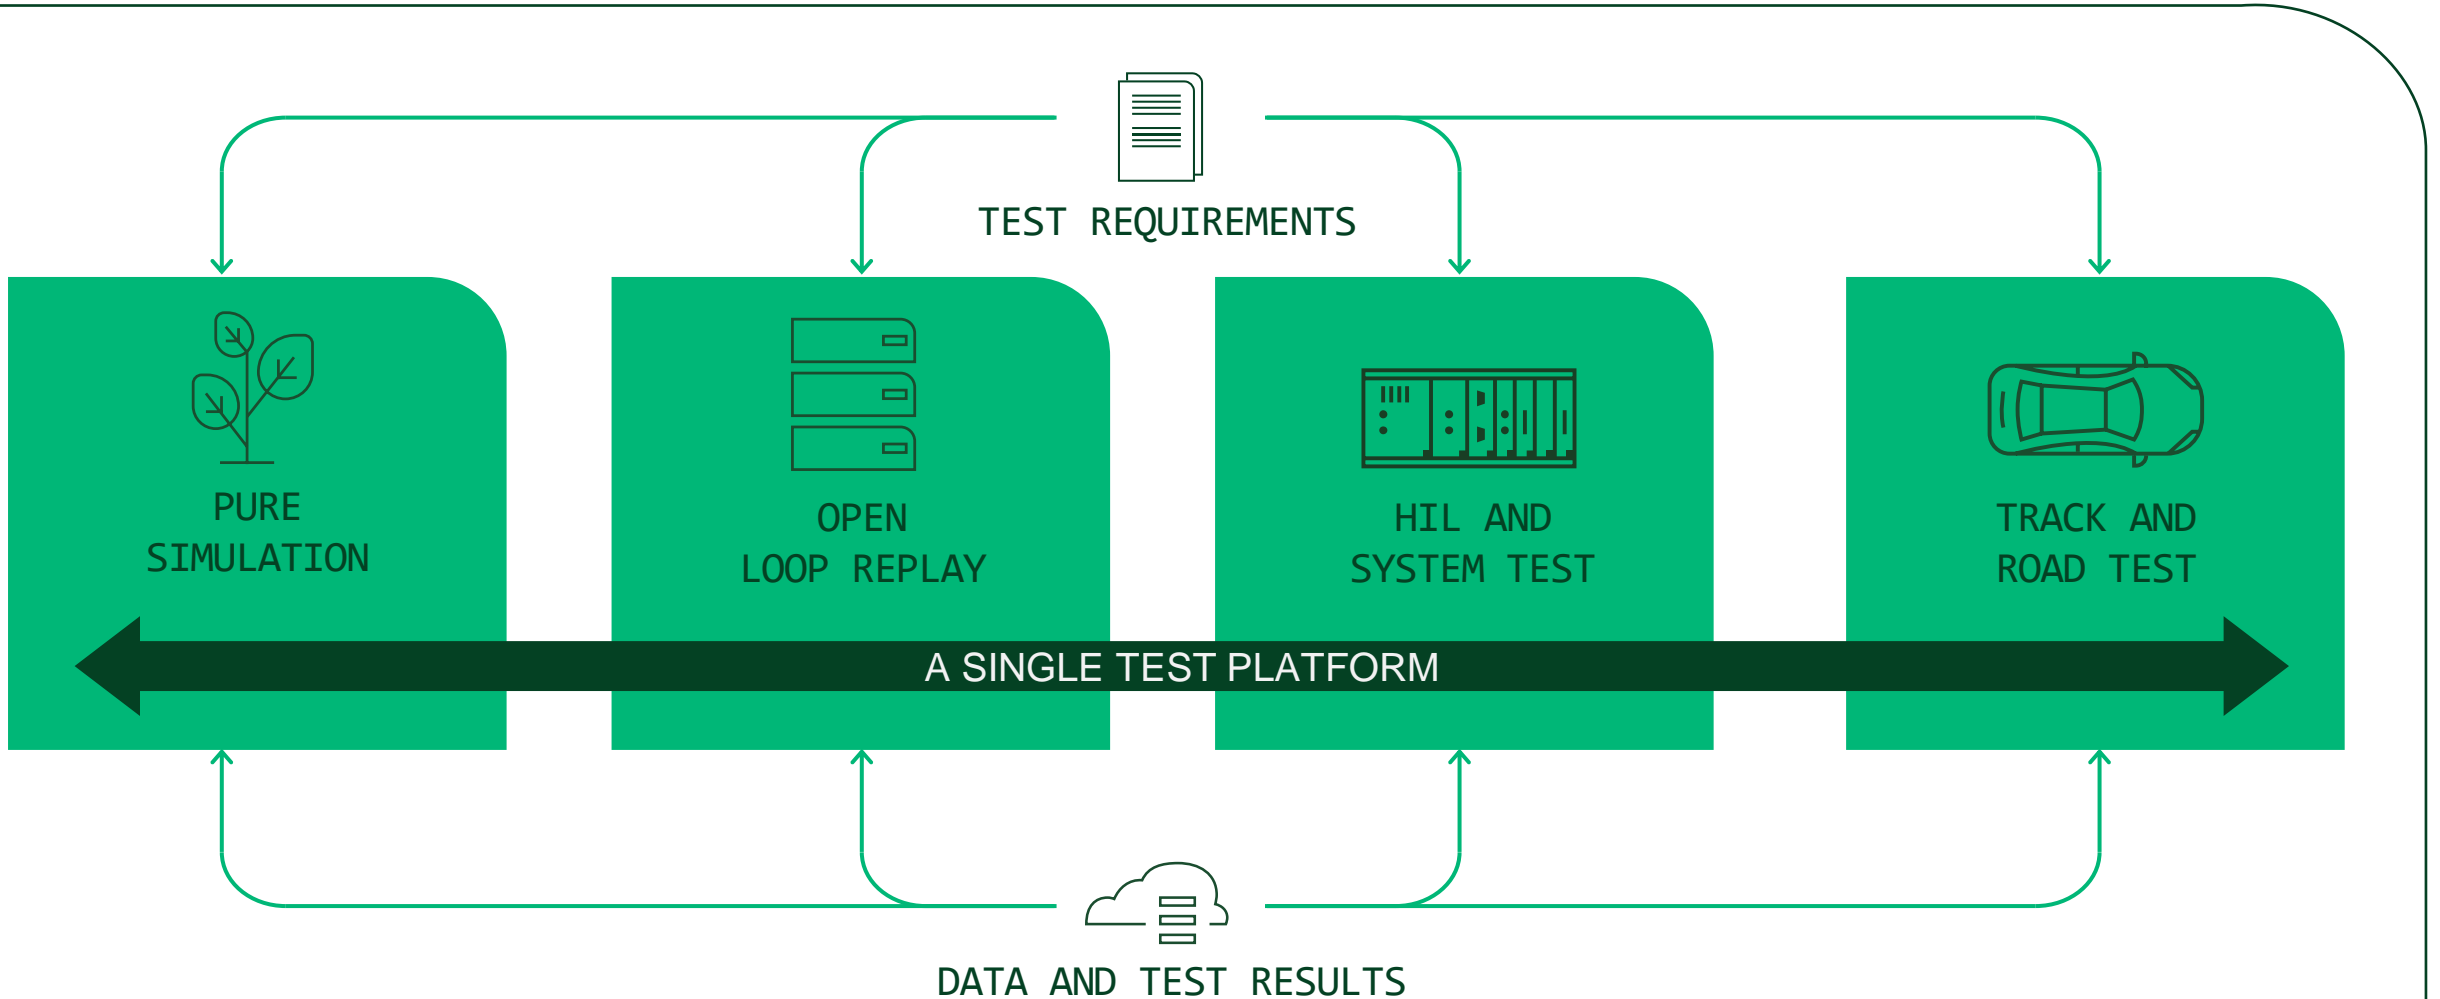

- Highly-representative vehicle model
- Advanced traffic and road simulation
- Intelligent driver model
- Integration platform
- Euro NCAP Scenarios Included
- Pharlap & Linux RT support for NI

- Open, software-centric platform
- Expansive technology eco-system
- FPGA-enabled I/O
- Advanced RF & TSN capability
- Certain IPG M-Board support natively in VeriStand

Best Practice – Reused, Unified Test Architecture

Achieving a Software-Connected Test Continuum

Thank you!

Together

we're better.

J Groenewald
